

**NEW!** Titan V-Shear Spiral Heads

**Titan V-Shear spiral heads are an excellent upgrade for many planers and jointers.**

- Reduce Noise! Spiral heads often reduces planer cutting sound by an average of 25 decibels.
- Shear cutting reduces grain tear-out and fuzzing on the wood as well as extending the edge life on the carbide insert knife. Works great in curly grain.
- Low operating cost because the four sided carbide knives can last up to 50 times longer than standard steel blades. If you happen to nick a knife; you simply turn it to the next sharp edge. Replacement inserts are affordable and readily available. (15x15x2.5 8R)

- V-Shear design directs the wood chips toward the dust collection chute.
- The head body is nickel coated to increase durability and resist corrosion.
- Custom sizes can be made in about 8 weeks. Just fill out and send us the V-Shear planer and jointer head worksheet to receive a quote. This will also provide the details we need to manufacture the head.

V-Shear Spiral Jointer / Planer Heads		
Jointer / Planer Model	Part #	Price
6" General Jointer	MS-BS G6-63	\$389.00
6" Yorkcraft YC-6J Jointer	MS-BS YC-6J	\$389.00
8" General 80-200 Jointer	MS-BS G8-80-200	\$481.25
