

Dual Hook Moulder Heads

IN STOCK

We offer a complete line of dual cutting angle moulder heads for cutting both hard and softwoods with the same tool - like getting two heads for the price of one! This is the best choice for custom millwork producers who need the flexibility to handle any job at a moments notice without having to stock many different cutterheads. Our stock heads are 12 degree cutting angle for hardwood to reduce raised grain, and 20 degree cutting angle to reduce fuzzing in softwoods. Only 2-knives are required

on non-jointed moulders, using 4-knives will not improve the surface finish. We can also supply filler wedges for the empty unused pockets. All heads are precision CNC machined from high strength hardened alloy steel and designed to operate at speeds up to 9,000 rpm. Heads are made to exceed the most stringent European OEM standards allowing you to produce smooth material finish with years of trouble free use. Custom cutter heads can be produced with any cutting angle, body diameter, and bore sizes - call for prices.

Corrugated Filler wedges. See page 38.
Cost \$2.75 each per lineal inch

Weinig, Wadkin, SCMI, IIDA, Leadermac, Woodmizer, Silver, & other Mid-Sized Moulders:

The S122 line, 4.80" body diameter, is designed for use on most European & Asian imported moulders using industry standard features and metric hardware. Plus we have added features not offered by the German tool makers such as a high alloy strong tool steel body for greater tool life and deeper knife pockets to allow wider and thicker steel to be used for additional resharpenings.

Dual Hook Moulder Heads 4-Knife, 12/20 degree

Shapers, Paulson, XL, & Import Brand Moulders:

The S100 dual hook line has a 4" body diameter with a 1-1/4" bore that is designed for spindle shapers and most smaller non-jointed moulders. These heads offer the flexibility to use corrugated knife steel with high rpm rotation to cut either hard or softwoods with the same head body. Bore bushings can be offered for shapers with 1" diameter spindles.
